PROFESSIONAL SUMMARY

Software Engineer with hands-on experience designing, developing, and maintaining web applications and portal systems using React.js, Angular, and TypeScript. Experienced in integrating front-end components with backend services via REST APIs, writing clean and maintainable code, troubleshooting and resolving application issues, and delivering scalable software within Agile/Scrum environments. Also builds AI-integrated mobile applications, combining front-end development with Firebase-powered backend and AI features. Seeking a Software Engineer role designing and maintaining secure, high-quality, scalable software solutions.

EXPERIENCE

Amanat Al-Hail (Hail Region Municipality) — Software Engineer *July 2026 – Present*

- Design and develop “Tam,” a facility-management platform for Amanat Al-Hail, using React.js and modern front-end tooling, writing clean and maintainable code aligned with project requirements.
- Develop and maintain the Tadsheen website, implementing features end-to-end and enhancing existing functionality based on business needs.
- Collaborate daily with developers, project managers, and other stakeholders through team meetings to align on technical requirements, track progress, and resolve issues.
- Participate in administrative and technical coordination tasks that support on-time software delivery.

JODAYN Information Technology Company — Cooperative Trainee, Business Development Sector *7 Months*

- Designed and delivered 12+ system screens and interfaces for Anan System, a company digital portal solution, using Figma with full design fidelity from wireframe to production.
- Developed and integrated front-end components with backend services via REST APIs, ensuring seamless data flow and reducing handoff revisions across 2 major releases.
- Tested, troubleshooted, and resolved UI inconsistencies across browsers and devices, improving application stability and code quality.
- Collaborated with cross-functional teams — developers, product managers, and QA — within Agile/Scrum sprint cycles, translating wireframes into production-ready React.js screens with 100% design fidelity.

University of Hail — Student Employee, College of Computer Science & Engineering *Sep 2022 – Jun 2023*

- Supported daily college operations and administrative workflows; produced graphic design assets for 3 student clubs, covering 5+ events and campaigns.

PROJECTS

Masareefy— Personal Finance iOS App

- Built an iOS application for managing daily and personal expenses, integrating Firebase for authentication, real-time data storage, and AI-powered features.
- Designed AI-driven savings tools that analyze user spending patterns, provide personalized insights, and motivate saving through gamified challenges.
- Implemented user authentication and secure data persistence using Firebase Auth and Firestore/Firebase services.

SparkHub System — Graduation Project

- Developed a scalable portal platform centralizing university club events, workshops, and activities; led requirements analysis and system design, built a responsive Angular front-end, and coordinated integration with Django backend services.

SkillUp Platform (Built for JODAYN Company)

- Built a React.js web application with component-based architecture and REST API integration, using a Firebase backend for role-based learning, course management, and real-time progress tracking across 6+ course modules.

TECHNICAL & SOFT SKILLS

Development: React.js, Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Firebase, REST API Integration, Component-Based Architecture, Clean Code Practices

Testing & Quality: Cross-Browser/Device Troubleshooting & Debugging, UI Consistency Testing, Code Reviews

Design & UX: Figma, Wireframing & Prototyping, Design Systems & Component Libraries, User Research, Responsive Web Design

Tools & Methods: Git & Version Control, Agile/Scrum, Azure DevOps, Trello, Cross-Functional Team Collaboration
Soft Skills: Problem Solving | Communication & Teamwork | Time Management | Attention to Detail | Adaptability

EDUCATION

University of Hail — Bachelor of Software Engineering *2021 – 2026 | Second Class honor | GPA: 3.406 / 4.00*

CERTIFICATIONS

- Interactive & Dynamic Front-End Development using React.js — Tuwaiq Academy | *45 Hours*
- Cloud Computing Using Microsoft Azure Bootcamp — Saudi Digital Academy SDA | *August to now (7 Week)*
- Foundations of UX Design — Google
- UI/UX Design Using Figma — Udemy
- Swift Programming (Levels 101 & 102 & 103) — Satr Platform
